

Run Certificate

run-certificate:ncd-asthma:all-scenarios-default-20260602b:v1

Asthma Run Certificate

This certificate records the scenario-country runs present in the source validation-run JSON. It is runtime execution evidence, not a claim that the model agrees with OneHealth Tool, Spectrum, or any other external comparator.

Run Identity

Status	pass
Run id	all-scenarios-default-20260602b
Model card	model-card:ncd-asthma:client-manifest-current:v1
Scenario scope	all
Country scope	default
Rows certified	30
Status definition	pass means the Rust runner exited successfully and emitted result rows for the scenario-country run
Generated file retention	temporary materialised models, data bundles, and result CSVs are discarded after hashing and headline extraction
Source run file	65c637e60967e15878c9a8df7fb5748936c7465d0a9f0be25c0345320e84902d
Source run semantic	9255bc6b6fd10c7035ff6f7e509dfa34ece9a6cf87a12c93bdacf40a017ea946
Certificate	1348fd1d132f9917e06f0fbba657b224c1eda582a9040bfb8e83f027bc01942b

Reference Headline Figures

Metric	2025	2030	2040	2046
Population at risk	128.38m	143.11m	173.51m	191.98m
Asthma prevalence state	5.90m	7.55m	10.16m	11.49m
Asthma incidence flow	772.6k	836.1k	945.8k	1.01m
Asthma mortality flow	6.0k	8.4k	14.3k	18.7k
Years lived with disability	11.81m	15.09m	20.31m	22.98m
Years of life lost	1.19m	1.32m	1.52m	1.64m
Healthy years lived	114.90m	128.73m	156.35m	172.71m

Warnings

This certificate records runtime execution evidence only. It does not compare model outputs with OneHealth Tool, Spectrum, Appendix 3 reference outputs, or another external comparator. Generated data bundles are identified by hashes in the run JSON, but the hosted unified API/datafetcher source version that produced them is not pinned in this certificate.
